

UK Client List

01. 2018

Over the past two years we have worked with over 200 UK clients ranging from well-known national brands to well-loved local charities. Some clients work with us in just one area; others take a range of services. This list shows our recent clients across four areas:

Benchmarking: Analysing performance data from groups of charities, to provide a timely snapshot of the latest trends. This includes Legacy Monitor, Legacy Marketing Benchmarks and sub-sector benchmarking projects

Forecasting: Working with individual charities to project legacy income and donor numbers, to aid financial planning and risk management

Research: Bespoke consortium projects on emerging issues such as In-Memory Insight, the Invisible Legator and Baby Boomer Legacies

Consultancy: Providing an objective perspective on strategy and potential, to inform long-term decision-making

We work in partnership with [Hospice UK](#) to offer local hospice charities tailored modules of our research and benchmarking programmes at reduced costs.
